TO PLANT ROSES Follow simple directions as in picture below. A well drained soil is essential. With heavy soils adequate drainage should be provided. Plant below the bud or where the branches start. This is usually about 2 inches deeper than they grow in the nursery row. After planting, mound up about 6 inches high around the top of plant. Cut off top of rose bushes 1 or 2 inches above top of mound. Do not remove mound for at least ten days. Plant roses in beds 18 to 24 inches apart. Water well when planting.
